CL004GZ02

40V Max Brushless Stick Vacuum (400mL)

40V Max Brushless Stick Vacuum

The 40V Brushless Stick Vacuum delivers ultimate power for enhanced dust and debris pickup. Featuring an integrated cyclone system and a motorised brush head, the CL004GZ02 effectively lifts and captures debris embedded deep in carpet fibres. The motorised brush head also assists forward movement, allowing the cleaner to glide smoothly for easier cleaning.

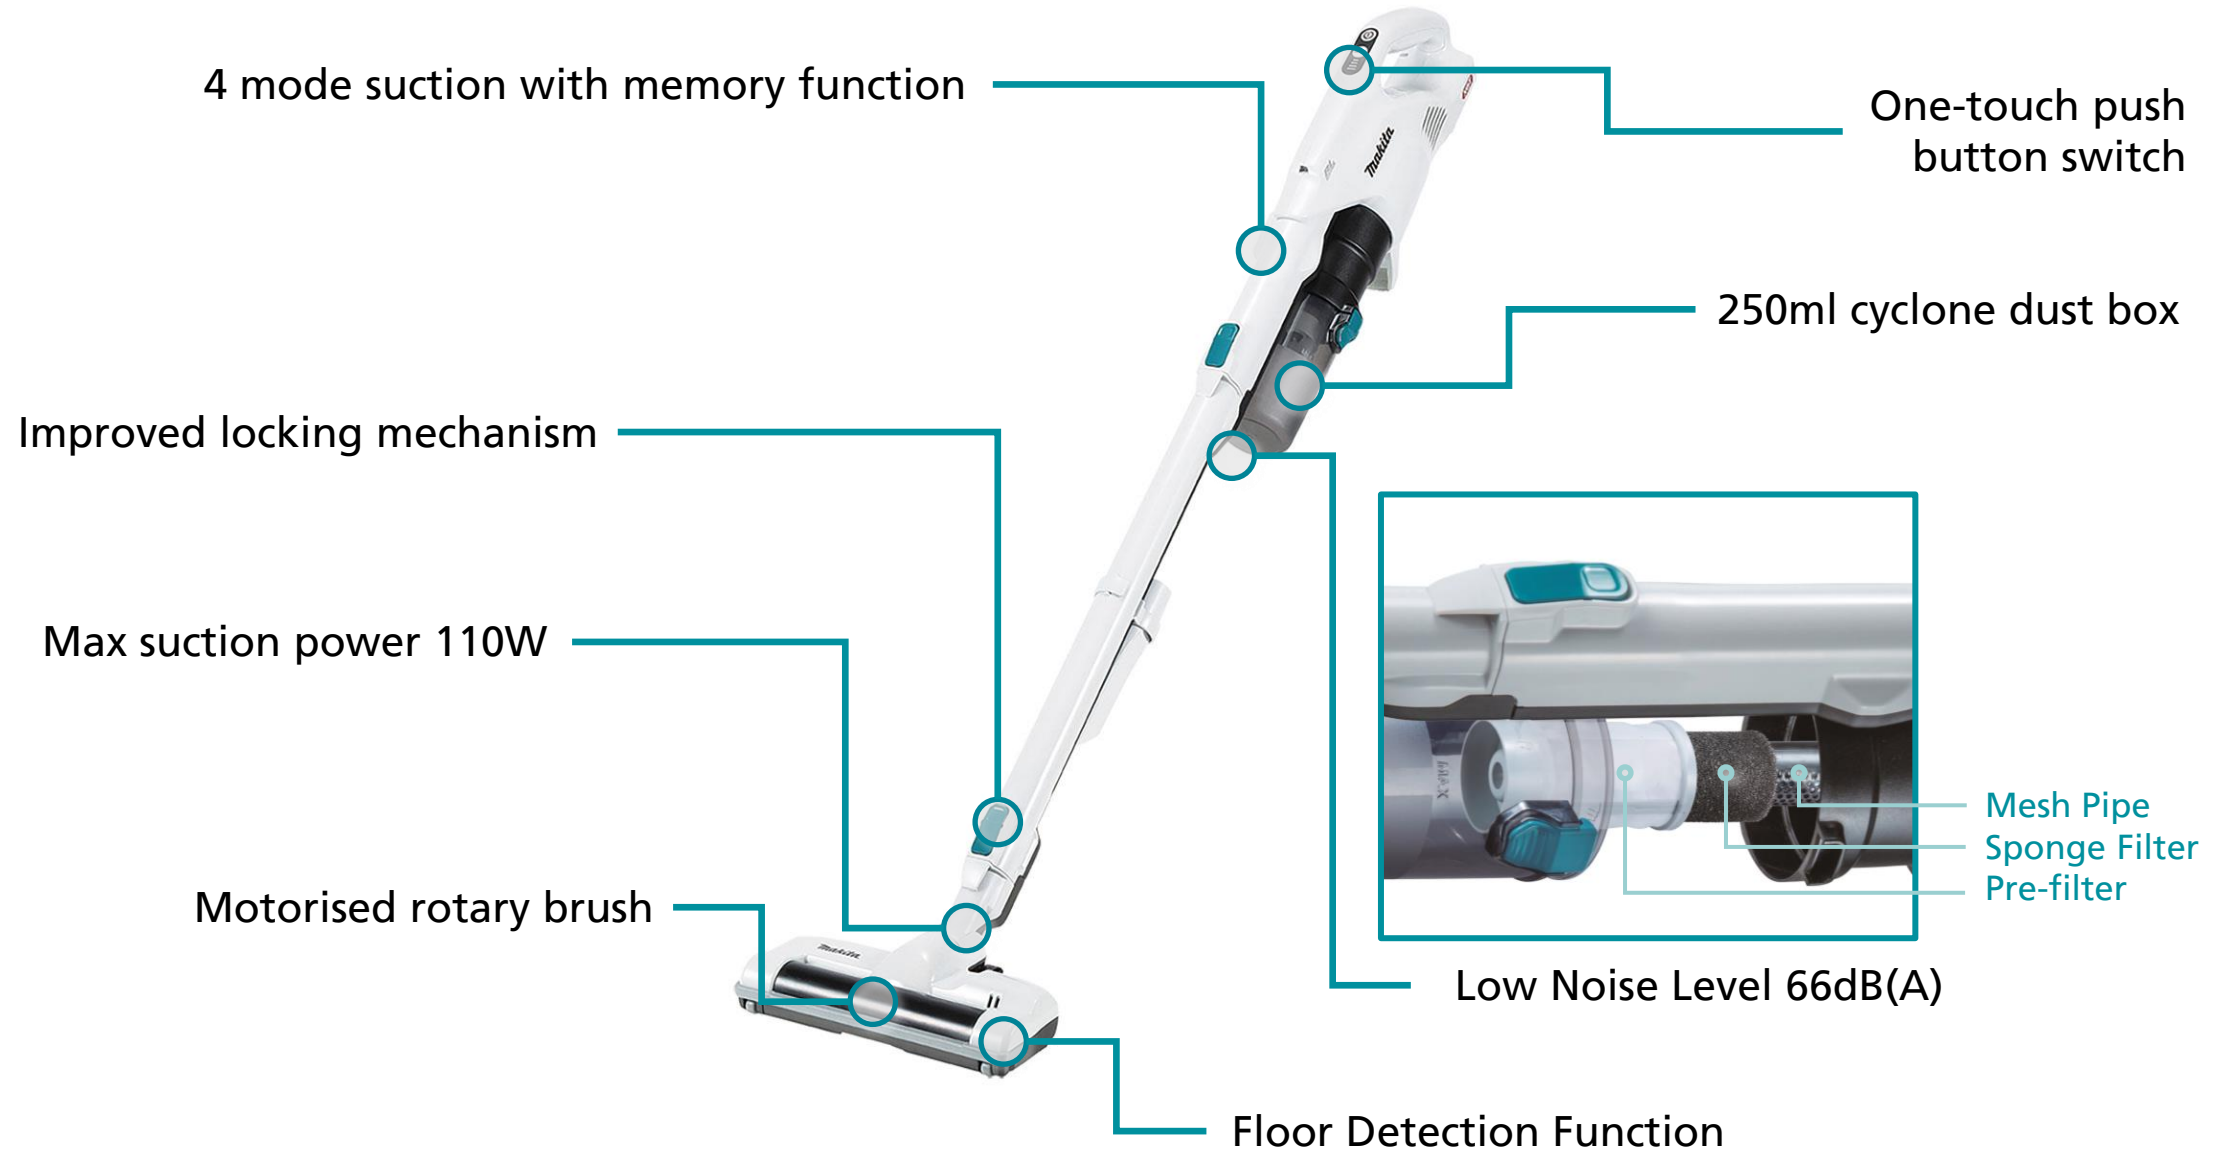

The CL004GZ02 delivers a maximum suction power of 110W with a low noise level of 66dB. The vacuum features 4 selectable suction modes, along with a memory function that recalls the last used setting for faster, more convenient start-up.

With floor detection technology, the motorised brush head automatically activates when the floor nozzle contacts the floor, maximising efficiency and battery performance.

Delivering advanced technology, powerful suction and user-focused features, CL004GZ02 is a high-performance cleaner for everyday vacuuming.

Product Overview

Product Specification Sheet

Max. sealed suction	20kPa
Max. air volume	1.0m ³ /min
Capacity	440mL
Suction power	110W, 70W, 40W, 20W
Continuous Runtime (Max)	22 minutes (BL4040)
Overall Length	1,074mm
Skin weight	1.5kg
Weight (with battery)	2.2kg (BL4025)
Voltage	40V Max
Compatible batteries	BL4020 / BL4025 / BL4040 / BL4040F / BL4050F

- **4 mode suction with memory function** – allows user to switch between different suction modes to match cleaning requirements and remember last mode used for added efficiency
- **Improved locking mechanism** – Ensures parts (pipes & nozzles) stay firmly connected during use, reducing accidental disconnections
- **Max suction power 110W** – Strong suction to pick up stubborn dust, debris, or fine particles especially on carpets, rugs or surfaces with embedded dirt
- **Nozzle with a motorised rotary brush** – Actively agitates fibres or textured surfaces, loosening dirt that a static nozzle might miss for deeper cleaning
- **One-touch push button switch** – Quick and easy on/off control with minimal effort reducing fumbling or switching delays
- **250ml cyclone dust box** – Cyclone separation keeps heavier debris out of the filter, reducing filter maintenance and preserving suction
- **Low Noise Level 66dB(A)** – The pre-filter and sponge filter reduces wind noise from the mesh pipe for more quiet operation that is less disruptive in homes, offices or around people/pets
- **Floor Detection Function** – With the floor detection function, the motorised rotary brush starts when nozzle is in contact with the floor

TECHNOLOGY

With the floor detection function, the motorised rotary brush starts when nozzle is in contact with the floor

POWER

Max suction power of 110W with low noise level of 66dB

EFFICIENCY

Cyclone unit separates large dust particles from fine dust particles, reducing filter clogging
